

Electric Vehicle Penetration - India

Client-ready analytics and forecast dashboard using EV registration datasets

Overview State Analysis Penetration Class / Category Monthly Trends **Forecast to 2030** State Forecast

Monthly and Category Forecast to 2030

Forecast period: actual monthly data is used through December 2025. Predictions continue through December 2030. Model used: Polynomial Ridge Regression.

Model Fit Score shows how closely the model follows historical data. A value closer to 1 means stronger historical fit. It does not guarantee future accuracy.

National EV Monthly Forecast to 2030

Annual national forecast

	Year	Predicted_EV_Registrations	Actual_EV_Registrations	Data_Type
6	2021	556587.961	339814	Actual
7	2022	924736.8479	1057405	Actual
8	2023	1375449.2073	1578601	Actual
9	2024	1908725.0391	2027799	Actual
